Revision history

August 10, 1990

Standard, release 1.0. Reissued for compliance with Northern Telecom standard 164.0.

December 1, 1991

Standard, release 2.0. This document was reissued to include technical content updates. Due to the extent of changes revision bars were omitted.

December 1994

Standard, release 3.0. Reissued to include editorial changes and indexing. Due to the extent of the changes, revision bars are not used.

Contents

Introduction	1
Transmission considerations	3
Echo	3
Loss	3
Tandem switching	4
Public network tandem switching	4
PBX network tandem switching	4
Trunk routing rules	5
Transmission planning	7
Placement of nodes	7
Tie trunk routes	8
Network call routing	9
Transmission controls	10
Two-trunk tandem routes	11
Three-trunk tandem routes	11
Off-network call routing	13
Network facilities	14
Private network facilities	14
Public network facilities	15

Transmission performance	17
Voice quality performance	17
Node-to-node connections	18
Node-to-main, satellite, or tributary connections	19
Voiceband data performance	20
Maintaining transmission performance	23
Installation	23
Scheduled maintenance	23
Corrective maintenance	23
Transmission testing of tie trunks	23
Testing loss	24
Testing noise	26
Transmission considerations for remote network access	29
Gain	29
Gain devices	29
Fixed gain	30
Voice-switched gain	30
Gain with compression	30
Recommendation	31
Adjustment	31
Application to trunks	32
Glossary	33
Public network facilities	33
PBX central office trunk	33
Foreign Exchange Trunk	33
Wide area transmission service	33
2-wire facility	34
4-wire facility	34
PBX types	34
Main PBX	34
Satellite PBX	34
Tributary PBX	34

Tandem PBX	35
ESN node PBX	35
ESN main PBX	35
PBX networks	35
Tandem tie trunk network	35
Common Control Switching Arrangement	35
Electronic Switched Network	36
Transmission level point	36
